# DIANA AND WEBLEY HI-POWER AIR RIFLES

## DIANA BREAK-DOWN AIR RIFLE

Hard Hitting, Long Range, Accurate Rifles  
with Rifled Barrel

About twice  
actual size

DIANA Air Rifles are world famous for their power and accurate shooting ability. This beautifully balanced Rifle has made many friends among Target Shooters all over Canada during the last three years. These Rifles are mechanically sound and built to precision standards, exceptionally easy to cock and reload. Solid Steel Rifled Barrel, Adjustable Rear Sight. Polished Stock and Fore-arm, metal parts highly polished and blued. Length overall 40"; weight about 5 lbs. .177 calibre only.

No. **10020**—Price each ..... **\$12.50**

No. **10036**—Webley Pellets, 177 Calibre, ..... Per Box of 1000 **\$1.20**

## NOTICE TO AIR RIFLE PURCHASERS

## THE NEW WEBLEY MARK II SERVICE AIR RIFLE

### 177 OR 22 CALIBRE

The WEBLEY Service Air Rifle Mark II is a super air rifle—It is built for high performance, possessing velocity and penetration at distances far in advance of any other air rifle.

A beautiful weapon that will make immediate appeal to the Target Shooter.

When you run over the exclusive features of this rifle, as shown below, you will appreciate what an outstanding advance has been made in air rifle construction.

**177  
CALIBRE  
IS THE  
MOST  
POWERFUL**

**MARK  
II  
IS THE  
LATEST  
IMPROVED  
MODEL**

**PERFORMANCE**—Extremely accurate for target practice and deadly at long range on crows, rabbits, etc.

**INTERCEPTING SEAR**—A unique point is the provision made in the air chamber for the interposition of the Patent intercepting sear which makes it impossible for the barrel to snap down should the trigger be pulled before the barrel is locked in firing position. This is a real "safety-first"—preserving the barrel from injury and the user against accident.

**LENGTH OF BARREL and Sight Radius**—Owing to the barrel of the WEBLEY Rifle being super-imposed a greater length is possible without interfering with the balance. This extra length also enables a longer sight radius to be obtained.

Length of Rifle overall .....	41½"
Length of Barrel .....	25½"
Length of Rifle with barrel detached .....	26"
Distance between Leafsight and Foresight .....	20"
Distance between Peepsight and Foresight .....	26"

No. **10012**—177 or 22 Calibre ..... Price, each **\$35.00**  
No. **10036**—177 Calibre Pellets ..... Per Box of 1000 **\$1.20**  
No. **10038**—22 Calibre Pellets ..... Per Box of 500 **\$1.20**

**WEIGHT OF RIFLE**—6 lbs. 7 oz. At least 1 lb. lighter than other of similar pattern.

**VELOCITY**—Super Velocity hitherto unknown. Improved rifling suits higher velocity.

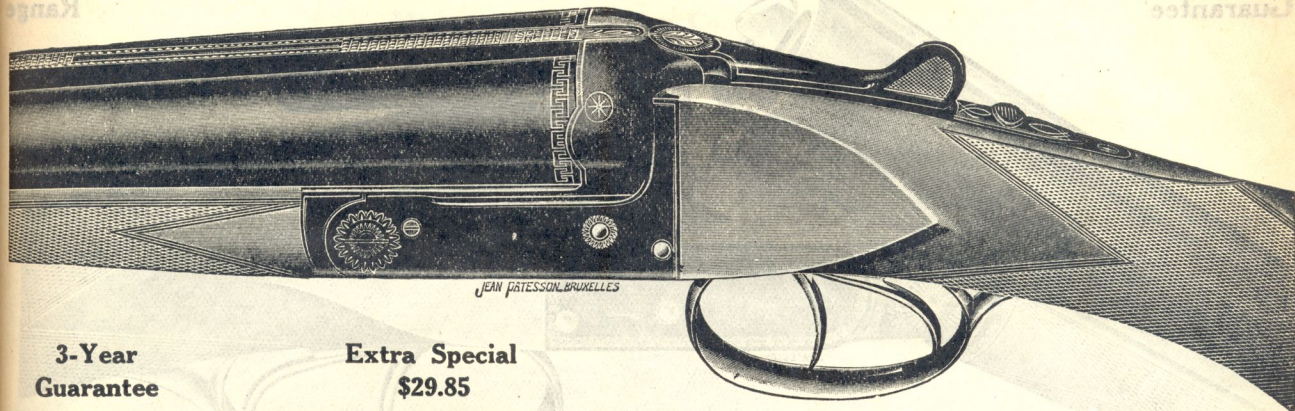

**BALANCE**—Perfect balance is obtained by the barrel being super-imposed on the air chamber, thus avoiding muzzle heaviness.

**SCREW GRIP**—Although the Rifle is of the "breakdown" barrel type the breach joint has been made 100% airtight by the introduction of a patent screw grip which forces the face of the barrel on to the joint washer, and at the same time ensures the return of the barrel to the correct position after each loading.

**PISTON**—A new and improved type, using a piston ring instead of a leather washer.

**FINISH**—The Air Rifle is highly finished and all metal parts are treated by the special Webley bluing process.

## A. L. & W. Falcon Model 36 Long Range Shot Gun

The A. L. & W. Falcon is a new gun designed and built for us, guaranteed for three years against defects in workmanship or material. It is made up with the best type of action, having Greener cross bolt, double under lugs and side lugs. This feature is supplied as a rule on costly guns only; the barrels, trigger guard, top lever, etc., are of a highly polished blue finish, the gun frame is bone case hardened, the fore-end has the push down fore-end system. This is undoubtedly the very best type of fore-end lock.

The stock and fore-arm are of walnut nicely hand checkered and finished.

Barrels are 30" long, left full choke right modified.

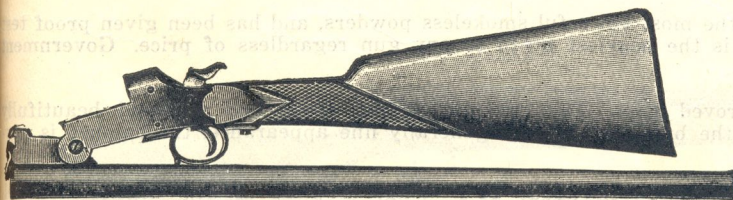

Range—this gun is chambered for 2¾" Long Range Shells, and is guaranteed to give satisfactory patterns, and do exceedingly good work at 60 to 80 yards.

Never before have the Gun Makers been able to turn out a gun of this grade and quality with 1936 improvements at anything like this price. We do not know of any gun that compares favorably with this under \$35.00 to \$40.00.

The specifications are standard. Stock 14½ inches long, about 2¾ inch drop at heel. Weight about 7¼ lbs. Automatic safety.

No. **10075**—12 Gauge only ..... Price, each **\$29.85**

## FOLDING SINGLE AND DOUBLE BARREL GUNS

### 410 GAUGE FOLDING SINGLE GUN

## A. L. &amp; W. IMPERIAL

3 Year  
GuaranteeLong  
RangeImperial  
Model 35

A. L. & W. Imperial is a most unusual gun. A high grade gun in the low priced field, all mechanical parts are hone polished and fitted by master gunsmiths, its quality design, finish and general workmanship are of the highest order, being strengthened at all vital points, including heavy double lugs, side barrel lugs, and Purdy style extension rib lock, these considerably strengthen the gun, and at the same time give the shooter the greatest security. This gun is exceedingly strong, yet not cumbersome.

## Fifteen Vital Improvements in the Model 32 Imperial Shot Gun

- |   |  |
|---|--|
| No. 1 and 2—Special heavy double locking lugs, usually supplied only on expensive guns. | No. 9—Well fitting, nicely finished top lever.   |
| No. 3—Flat table breech for strength and ease of cleaning.                              | No. 10—Automatic safety.   |
| No. 4—Side Lugs—Prevent wearing of locking bolts, through eliminating side vibrations.  | No. 11—Correctly designed triggers.  |
| No. 5—Purdy style cross bolt.   | No. 12—Long type trigger guard.  |
| No. 6—Rugged extractors.  | No. 13—Short hinge breech beautifully engraved.  |
| No. 7—Flat face on barrels for easy loading.  | No. 14—Push down fore-end, as used only on expensive guns, fine hand-checked fore-end and stock. |
| No. 8—Matted top rib.   | No. 15—Finish: Blued, highly polished.   |

Smoothness of operation—Has been brought about by fine fitting and polishing of parts.

Great precision and Long Range—due to barrels, lugs, etc., being clamped and welded in one piece, and to the special bore with Progressive Cone Type Choke, gas pressure is increased at the correct time to give you many extra yards, having a  $2\frac{3}{4}$ " chamber for long range shells; clean kills can be made consistently at 60 to 80 yards.

Strength—It is built with a special view to resist the most powerful smokeless powders, and has been given proof test No. 4 by the Belgian Government at Liege. This is the heaviest given to any gun regardless of price. Government proof certificate attached to each gun.

Style—The style and balance could hardly be improved upon. The graceful walnut stock and fore-end beautifully checkered, the smart clean-cut engraving around the breech add to its generally fine appearance, the balance is perfect and found only in expensive European guns.

Specification: Left barrel full choke, right modified choke, stock about  $14\frac{1}{4}$ " long, drop about  $2\frac{7}{8}$ " inches at heel. Barrel 12 gauge, 30"; 16 gauge, 28"; 20 gauge, 26". Weight 12 gauge about  $7\frac{1}{4}$ " lbs., 16 gauge about  $6\frac{1}{2}$  lbs., 20 gauge about  $6\frac{1}{4}$ " lbs.

No. **10069**—12, 16 or 20 gauge ..... Price, each **\$48.50**

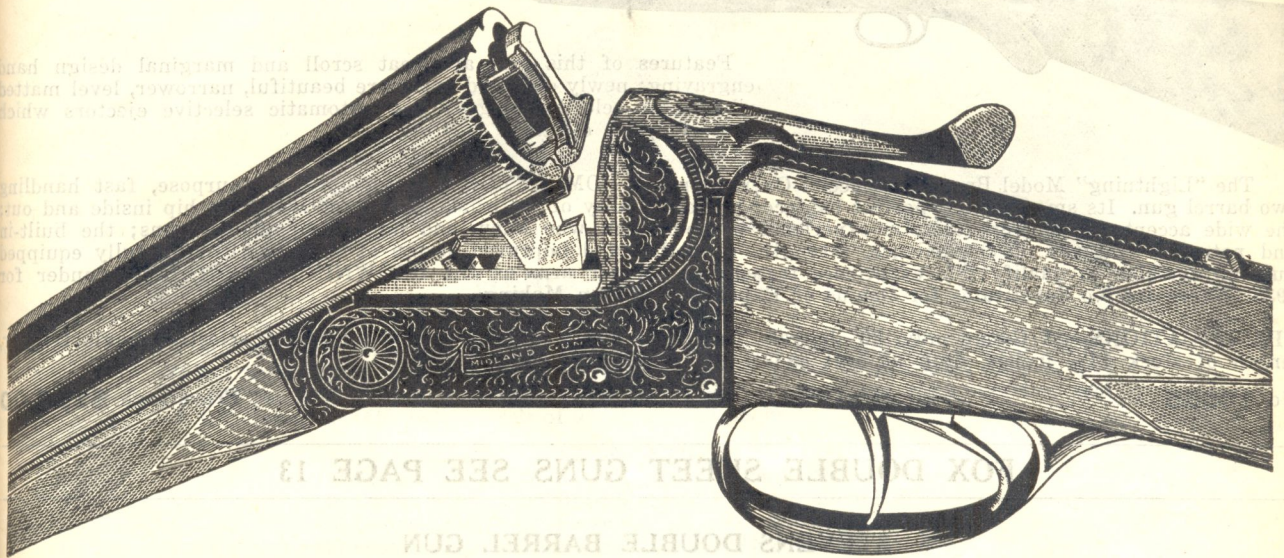

## IMPERIAL MODEL 32E—Automatic Ejectors

The new model 32E Automatic Ejector Model is of latest selective ejector type, throwing out only the shell or shells fired. Same specifications as regular Model 35, listed above.

No. **10070**—12, 16 or 20 gauge ..... Price, each **\$65.00**

# HIGH GRADE ENGLISH DOUBLE GUN

### SAVAGE STANDARD MODEL OVER-UNDER DOUBLE GUN

#### STANDARD GRADE HAMMERLESS, 12 GAUGE TAKEDOWN

**Barrels**—Barrels made of select forged gun barrel steel. Proof tested. Barrel length: 30" Chokes—Modified and Full.  
**Action**—Hammerless. With Automatic Top Tang safety. All component parts are made of long wearing special alloy steel. Action is equipped with unbreakable coil springs. Front Trigger fires lower barrel. When the top lever is moved to the right, the barrels open with their own weight as the hammers are cocked by the top lever, thereby removing all friction from the opening movement of the barrels.

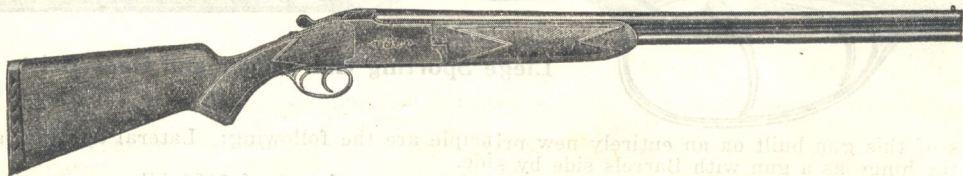

**Frame**—Hy-Tenso Steel—highly polished and blued. Barrels are bolted to the frame with a sliding locking bolt located between the upper and lower barrels. This method of bolting close to the head of chamber of both barrels insures positive lock-up and equal distribution of pressure from both barrels on locking lugs.

**Stock**—Selected walnut stock. Full pistol grip. Length about 14"; drop about  $2\frac{3}{4}$ ".

**Weight**—about  $7\frac{1}{2}$  lbs.

# SKEET AND FIELD GUNS

## WINCHESTER SKEET and FIELD GUNS

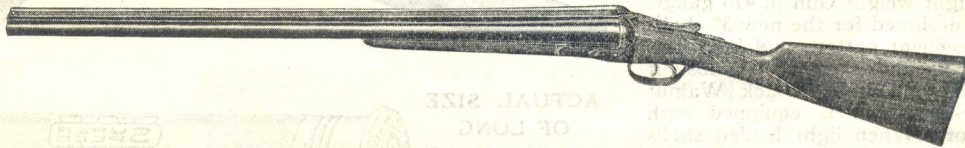

Designed especially for skeet shooting—and giving at the same time the best of service for the fastest upland game shooting. Model 21 finished its first skeet season holding the 12, 16 and 20 gauge long run World's Records and the National Telegraphic Championship. Since has won both the National 20-Gauge and National All-Gauge Championships. All Model 21 Winchesters are specially bored, by a Winchester method of true radius choke reaming. The skeet gun has, besides, its own special new chokes. These Winchester Skeet Chokes, No. 1 in the right barrel and No. 2 in the left, give the most consistently satisfactory skeet patterns, and the best for brush and short range field shooting. In all three gauges length of barrels is 26 inches. Also furnished, in all three gauges, with ventilated-rib barrel, at extra charge. Walnut stock with checkered straight grip; checkered wood butt (no plate or pad), 14" x 1½" x 2", with 1" pitch. Walnut beaver-tail forend, handsomely checkered. Single trigger, selective ejection, non-automatic safety. Boring as above.

# SINGLE BARREL GUNS

**IVER  
JOHNSON  
CHAMPION**

Made  
in  
Canada

Iver Johnson Single Guns are now made in Canada of finest materials at reasonable prices. The quality of this famous model is being kept to the high Iver Johnson standard. All Iver Johnson Single Guns are perfectly balanced and are easy to handle and smooth in operation. The barrel and lug are forged in one piece from solid bar high carbon steel. This type of barrel guarantees you a barrel to safely shoot any regular factory loaded shells. The joint pin is large giving long wearing qualities. Compensating locking bolt is an exclusive Iver Johnson feature, so constructed as to automatically take up the wear and to safeguard the gun against shooting loose. Safety Action—When gun is in cocked position it locks the gun against opening or closing. All guns have automatic ejectors to throw out shells clear of the gun.

## LEFEVER SINGLE BARREL GUNS—New Long Range Lefever Single Field and Trap Gun

LEFEVER SINGLE BARREL LONG RANGE  
FIELD AND TRAP GUN

12, 16 or 20 Gauge

The only inexpensive hammerless single barrel breech loading shotgun with an automatic safety device such as used on expensive double guns, and an automatic ejector which kicks the shell out when the gun is opened. Has a genuine black walnut stock with full pistol grip hand checkered, hard rubber grip cap and butt plate. The forearm wood is black walnut hand checkered, and, like the walnut stock, highly finished with Duco. This, forearm is the trap gun which fills the hand and keeps the hand off the barrel. The forearm may be snapped on or off with one hand and the barrel quickly taken off the stock and frame. The stock length is approximately 14 inches, the drop about 2⅞ inches. Gauges, lengths and weights are: 20 gauge 28 inch, about 6 lbs., 16 gauge, 28 inch about 6¼ lbs., 12 gauge, 30 inch about 7 pounds, and every barrel is proof tested with an excessive load to make doubly sure it has the necessary material and strength to be safe for AN standard factory load. Every Lefever single is carefully choke bored to give the closest, hardest long range pattern. The Lefever is standardized gun, and must remain standardized in order that it may remain an inexpensive, a SAFE and durable gun. No specifications other than those mentioned can be furnished.

## GENUINE MAUSER RIFLES

### THE ORIGINAL MAUSER SPORTING RIFLE

Manufactured by Mauser at Oberndorff-on-Neckar, Germany

Possesses the well-known genuine Mauser repeating action clip-loading system, specially adapted to sporting purposes.

It is furnished with all the latest up-to-date Mauser improvements, such as the automatic cocking arrangement. a flange on the bolt plug to guard the shooter's face against any escaping powder gases in the event of a defective cartridge case.

In the genuine Mauser rifle there is no detachable bolthead, the locking lugs are consequently solid with the bolt. is, therefore, impossible to fire the rifle with the bolthead missing, and equally so unless the lugs are properly seat in their respective recesses.

The sporting rifle weighs about 7½ lbs., is a sporting weapon of considerable ballistic properties, as may be judg from the particulars of firing tests of which details are given further on.

The Magazine, holding five cartridges, is situated beneath the action. At the bottom the magazine is closed by a pla which is flush with the stock, and prevents the admission of moisture, impurities, and other foreign matter. The loadin of single cartridges can easily be effected by hand. Single cartridges have only to be placed on the platform and press into the magazine. The magazine may thus be replenished to its capacity at any time and at a minimum expenditu of time and trouble.

## B.S.A. NEW MODEL 15 TARGET RIFLE

.22 CALIBRE

Here is a new and more modern B.S.A. Rifle for .22 bore marksmen.

Length—Overall, 44 inches.  
Length of barrel, taken down, 29 inches.  
Weight—9 lbs. 7 oz.  
Diameter of barrel (outside) at muzzle, ¾ in.  
Distance between foresight and aperture backsight, 31½ in.  
Balance—7¼ in. in front of trigger.

The barrel and action are exactly as fitted to the world-famous B.S.A. No. 12 Rifle, but the fixed portion of the backsight is now an integral part of the body. The sturdy construction of the back sight ensures perfect rigidity—there is not the slightest trace of backlash in the windgauge or elevating movements. This new B.S.A. Rifle has a particularly handsome appearance, as a glance at the illustration shows. Special attention has and is being paid to the bore of the barrels and very fine shooting is being done. This new model has been subjected to exhaustive tests to ensure that its accuracy is unsurpassed; that it is perfectly balanced and easy to handle.

## MARBLE'S ADJUSTABLE LEAF SIGHT

Made to Fit American Standard Rifles

The leaf is firmly held in position by the spring on the long flat part when either up or down, and can be instantly put in either position. When folded down it permits a free use of peep and front sights.

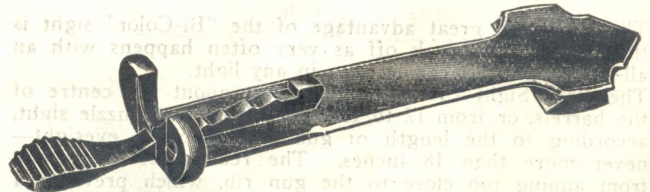

The notch-piece is held at elevation desired by the screw at its side, and is also reversible. The "V" shaped notch is for use with Rocky Mountain Front Sight. The half-round notch is for use with Bead Front Sights.

In addition to its utility as a middle sight it serves as a check to detect any deviation in the alignment of the other sights.

Mention model and calibre when ordering.

## MARBLE'S SHOTGUN SIGHTS

### FOR DOUBLE BARREL GUNS

Actual Size 5/32 in.  
Bi-color Front

Ivory Front

Ivory Rear Sight and Reamer for Double Guns

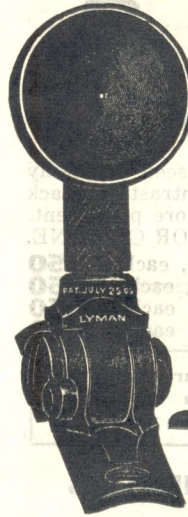

The chief and great advantage of the "Bi-Color" sight is that it will not break off as very often happens with an all-ivory sight. It can be seen in any light. The Rear Sight should be placed at about the centre of the barrels, or from 12 to 16 inches from the muzzle sight, according to the length of gun and shooter's eyesight—never more than 18 inches. The rear sight keeps one from aiming too close to the gun rib, which prevents a clear view of the bird and causes under shooting. Good alignment cannot be secured without a rear sight.

**WOOLENSAK RIFLESCOPE**

This four power riflescope makes the target or object appear four times larger or four times closer, thereby making it easier for the shooter to see exactly where he is sighting.

The five lens optical system gives high light transmission and clear view. Each scope is focused at the factory to reveal objects clearly from close-up to infinity without adjustments.

The rear mount holds the scope in three point suspension and is equipped with micrometer screws for windage and elevation adjustments.

The front mount has a sleeve and spring plunger which engages in a groove to prevent the scope from rotating in the mount. Provisions are made however, to permit the scope to slide when subject to recoil.

Bases for holding mounts to rifle are accurately machined and supplied with screws ready to attach, and are made in various sizes to fit practically all rifles.

An offset base that permits the scope to lay over the side of the barrel is available at an extra charge.

**MARBLE'S ANTI-RUST ROPES**  
 For Shotguns and Rifles

When saturated with oil these "ropes" exclude all air and moisture and make it impossible for the barrels to rust or become pitted. They are longer than the barrel and larger than the bore. This insures a constant pressure of oil against the entire circumference of the bore. One oiling will last for a year.

For shot guns, 12, 16 or 20-gauge; for rifles, state calibre.

**MARBLE'S RIFLE CLEANER**

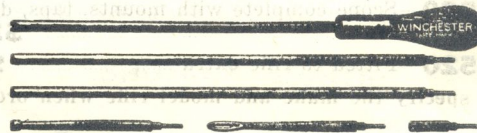

The sections are made of a number of discs cut from softest brass gauze. They are separated by small fibre discs and strung on a spirally-bent spring-tempered steel wire.

The sections are smaller than the bore of a rifle or revolver, therefore the spiral core forces only one part of each section against the bore, with the result that the cleaner may follow the twist—reach into every angle of the rifling and rapidly remove all lead, copper, rust of powder residue.

No. **10560** ..... Price, each **.80**

**WINCHESTER RIFLE CLEANING ROD**

For Rifles of .30 Calibre or Larger

**MARBLE'S NITRO-SOLVENT OIL**

A solvent is combined with a lubricant and other ingredients to make an oil that will dissolve and remove powder residue and leave the barrel and works lubricated.

It stops corrosive action by neutralizing the acids of the residue before or after they have penetrated the steel.

It removes and prevents rust. Contains no acid. Will not congeal. Cleans and polishes varnished finishes.

Because of the solvent properties the oil does not dry up quickly and will not gum.

well known to oil users. Filled with high grade oil, which can be refilled when emptied. Size One oz.—2¼" diameter, ¾" thick.

No. **10790** ..... Price, each **.50**

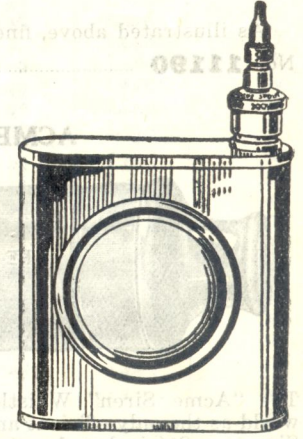

- (1) The stopper cannot be lost.
- (2) It has a metallic valve which heremetically seals the outlet.
- (3) A half-turn of the nozzle opens or closes it.
- (4) It is more serviceable than any other type.
- (5) It saves oil, time and temper.

It is strange that the world should have waited so long for such a simple yet practical and useful device. The mortality among oil cans that have lost their stoppers is prodigious and the loss of oil from unstoppered spouts and the loss of time cleaning up the consequent mess, is only too

**NEW "BONE DRY" HUNTING COAT**

The thought behind the already popular coat to provide—  
**FIRST**—All the protection required from snags, wind, etc., as it is accomplished by the use of our famous **RED HEAD** waterproof duck on the outside.  
**SECOND**—The utmost protection from rain as we employ a rubberized material as lining across shoulder, chest and back. Sewn in loosely so as to provide ventilation and the lower coat is lined with

the same material thus forming three large game pockets—entrance inside front edges and at back side seams from outside—which are blood-proof toward the shooter.  
**THIRD**—A coat lighter in weight than other waterproof coats, thus appealing strongly to the field shooter.  
**FOURTH**—No vest is necessary since shell loops are found, above the usual shell pockets, with capacity for twenty-four shells. Large flaps over the loops keep shells dry, quickly accessible, and prevent falling out no matter what gauge. A very sensible coat of **RED HEAD** quality. Sizes 38 to 46.

No. **14210** ..... Price, each **\$9.80**
